

AI Master Class

Your pathway to AI Master

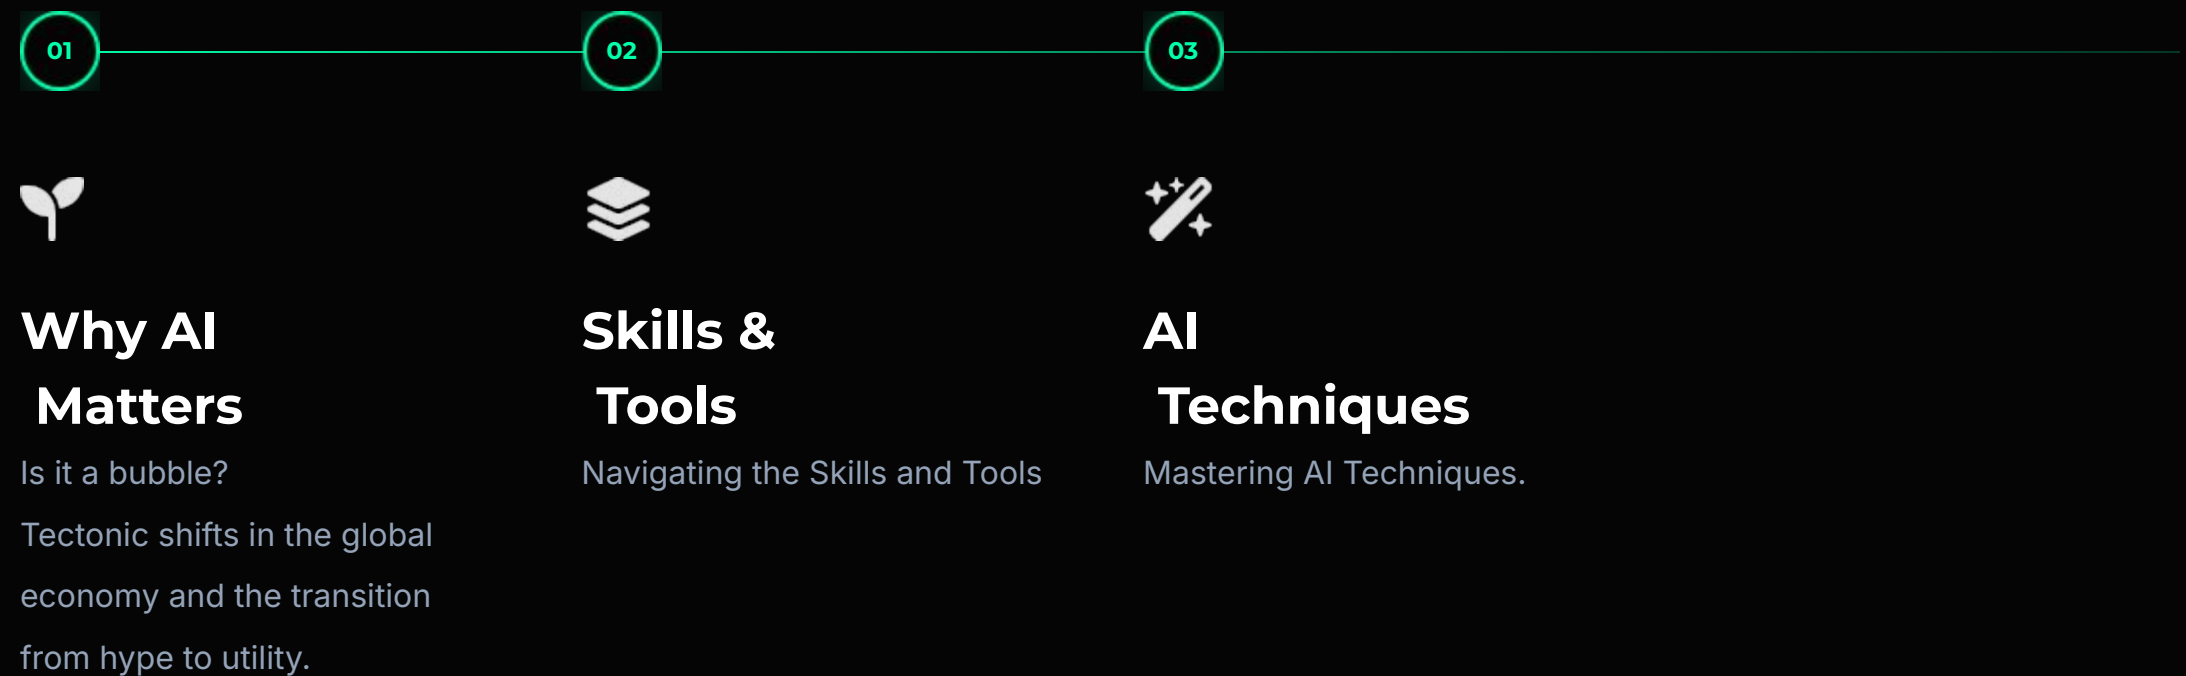

**AI is not going to take your job ,
but somebody using AI
absolutely will.**

The real displacement isn't machine vs. human; it's the speed of adaptation. Those who master it will win the new job opportunities.

SESSION PATH

AGENDA

PART
ONE

WHY AI MATTERS

UNDERSTANDING AI BEYOND THE HYPE

IS AI A BUBBLE?

WILL THE BUBBLE BURST!

THE DOT-COM BUBBLE ANALOGY

Speculation Fades

In 1999, valuations outpaced utility, leading to the bubble burst. Today, has already proved it utility.

Infrastructure Stays

Just as fiber optics remained after the 2000 crash to enable the modern web, the data centers and compute models built today are the permanent foundation of the future.

THE TRILLION-DOLLAR Market

\$1.8T

AI Market compared to Oman GDP

To get the scale of investment AI Global
Market size is equivalent to 14X the Annual
National GDP of Oman for 2025 (\$ 110 B)

AI Market Size

By 2030, AI Market size is expected to grow to \$1.8T . The market is growing at a compound annual rate of **37.3%**.

14X

THE TRILLION-DOLLAR GLOBAL IMPACT

\$15.7

T

AI Global Impact

By 2030, AI is expected to contribute an astonishing **\$15.7 trillion** to the global economy. This is not a fleeting trend but a fundamental re-architecture of value creation across every sector.

STUNNING ROI

Investment

\$1.00

Return on
Investment

\$3.70

\$3.7

0

Return on Every Dollar

For every \$1 spent on AI development, companies are currently seeing an average return of \$3.70. This is not experimentation; it is financial impact.

AI - A CATALYST FOR JOB CREATION

Jobs Eliminated (2025)

85 Million

New Jobs Created

97 Million

NET GAIN: +12 MILLION JOBS GLOBALLY

THE ENERGY FOOTPRINT FOR AI MODEL

150
GW

ENERGY TO TRAIN AI

Training a model like Gemini requires **150 GWh**. This is equivalent of the entire nation of Oman's total daily power consumption.

**Enough to power all homes in
Oman homes for a day.**

PART
TWO

AI SKILLS & TOOLS

GETTING READY FOR THE FUTURE

PROMPT ENGINEERING

COMMUNICATION SKILLS WITH MACHINE

Communicating with AI is as valuable today as conventional communication skills.

. Garbage in = Garbage out.

Master the language to extract gold.

THE 4-PART PROMPT STRUCTURE

Persona

"Act like a senior marketer"

Context

Background details & data

Task

Specific instructions

Format

Web Page, Bullet points, Spreadsheet, or PDF

Example of Golden Prompt: I want to invest in AI

AI Novice

Simple Query:

"What AI Stocks should I invest in?"

Result: Generic advice, high-level summaries, and common market data found anywhere online.

AI PRO

Persona: Act as a Senior Equity Research Analyst specializing in the technology sector and semiconductor industry.

Context: I am looking to diversify a high-growth investment portfolio by increasing exposure to the Artificial Intelligence vertical. Rather than looking at general software "wrappers," I want to focus on the "Infrastructure Layer"—specifically companies involved in GPU manufacturing, custom ASICs, and data center cooling technologies.

Task: Compare three leading publicly traded companies in this infrastructure space. For each company, analyze: 1. Their primary competitive moat; 2. Their revenue growth specifically attributed to AI over the last four quarters; 3. Two primary risks that could lead to a valuation correction in the next 18 months.

Format: Use a professional, objective, and analytical tone. Present the comparison in a structured web application Canvas, showing top stocks to invest in followed by a summary table at the end ranking them based on "R&D Spend as a % of Revenue."

The Golden Output

Persona: Act as a Senior Equity Research Analyst specializing in the technology sector and semiconductor industry.

Context: I am looking to diversify a high-growth investment portfolio by increasing exposure to the Artificial Intelligence vertical. Rather than looking at general software "wrappers," I want to focus on the "Infrastructure Layer"—specifically companies involved in GPU manufacturing, custom ASICs, and data center cooling technologies.

Task: Compare three leading publicly traded companies in this infrastructure space. For each company, analyze: 1. Their primary competitive moat; 2. Their revenue growth specifically attributed to AI over the last four quarters; 3. Two primary risks that could lead to a valuation correction in the next 18 months.

Format: Use a professional, objective, and analytical tone. Present the comparison in a structured [web application Canvas](#), showing top stocks to invest in followed by a summary table at the end ranking them based on "R&D Spend as a % of Revenue."

LIVE RESEARCH UPDATE: Q1 2026/27

AI Infrastructure: The "Picks and Shovels" Layer

Analyzing the Hardware & Thermal Management Backbone

SECTOR RATING
STRATEGIC OVERWEIGHT

Nvidia

Broadcom

Vertiv

Primary Competitive Moat

Liquid-to-Chip Physical Gatekeeper

With Blackwell chips approaching 1200W TDP, air cooling is physically obsolete. Vertiv's partnership with Nvidia to blueprint the 800V DC power architecture for "Rubin" makes them a mandatory partner for next-gen AI factories.

AI Revenue Performance (LTM)

Organic orders surged 252% in the most recent quarter. Backlog hit a record \$15B, with management guiding for 43% EPS growth in 2026 as liquid cooling deployments ramp.

AI Growth Rate: 28% YoY

R&D Intensity Ranking

Measuring long-term defensibility through innovation reinvestment

Metric: R&D Spend as % of Revenue

SUPPLY CHAIN FRAGILITY

Vertiv is shifting manufacturing from Mexico to high-capacity US facilities to meet demand; any delay in facility "bring-up" could result in backlog cancellations.

POWER GRID BOTTLENECKS

The risk isn't demand for cooling, but the physical availability of grid power. If utilities cannot scale, data center construction (and Vertiv orders) will stall.

AI DESIGN

Not Just a Photo but a full brand

Design is no longer strictly about technical ability; it's about the creativity of your ideas. Create photorealistic images in seconds.

THE TOOLKIT

Not Only A Design But a Full Brand

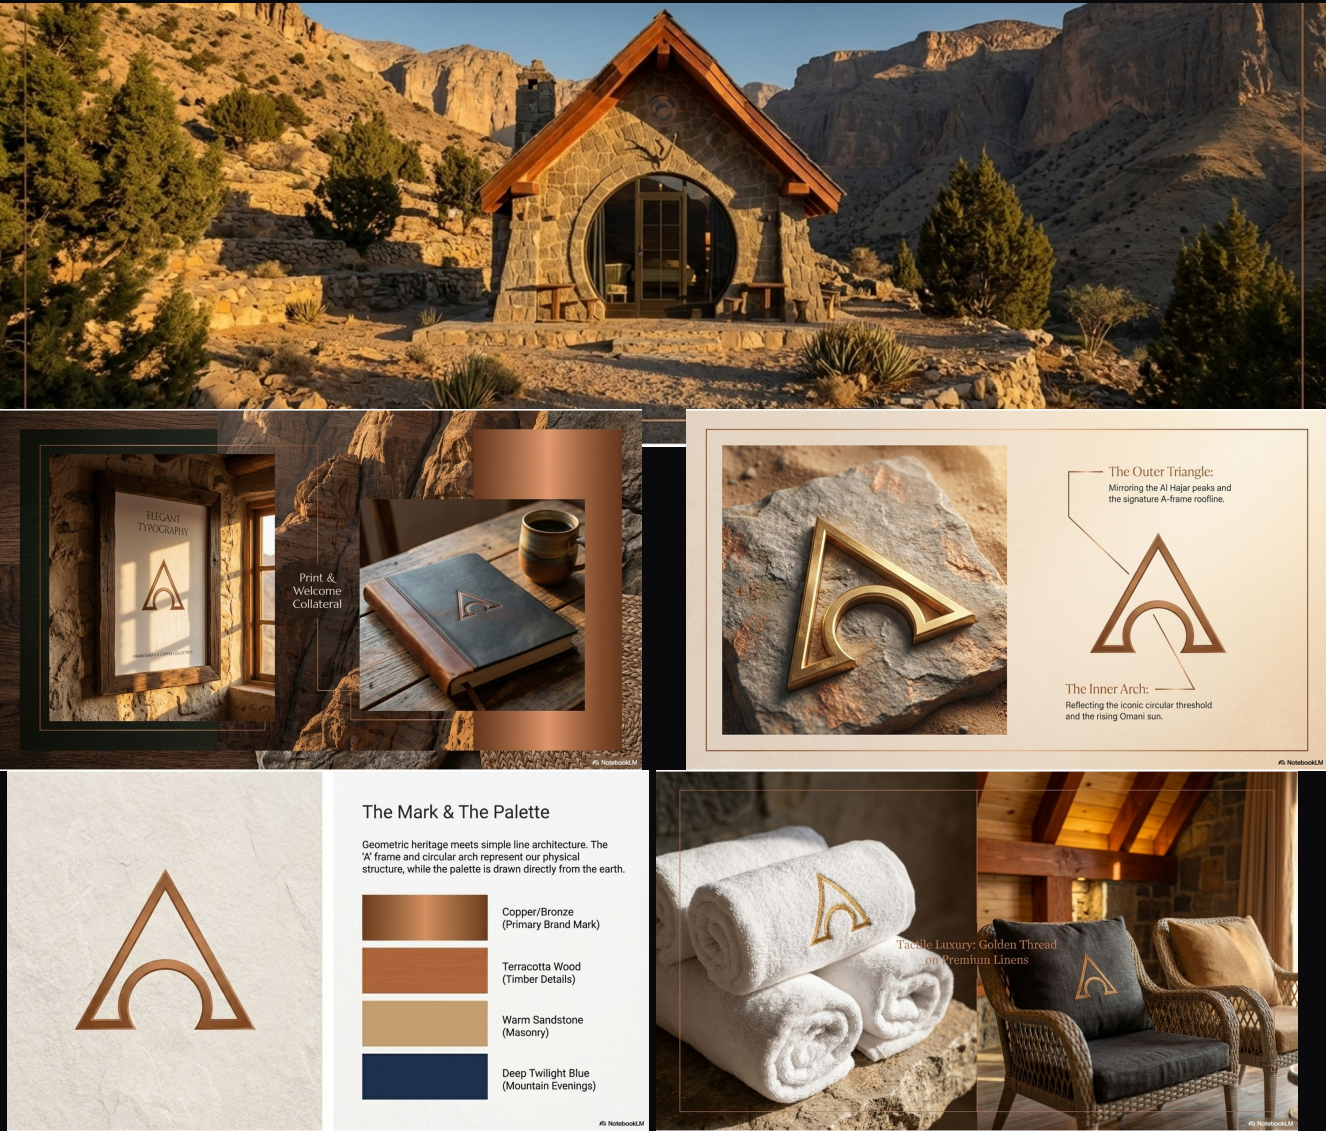

AI PRO Designer

Persona: Act as an expert brand strategist and visual identity designer specializing in boutique hospitality and heritage-driven brands.

Context: We are developing the brand identity for "The Old Man Cottage," a unique, small-scale retreat that blends a "Refined Rustic" aesthetic with cultural heritage. The cottage's defining architectural features are its steep A-frame timber roof, heavy stone masonry walls, and a prominent, large circular glass entryway. The brand has ties to **Omani heritage and geographic roots in Muscat, Oman**, visually represented by an elder mascot wearing traditional Omani attire, including a turban and a *khanjar* dagger. The core visual logo concept is part of a "Geometric Heritage Collective," utilizing simple line geometry that combines an 'A' shape (mimicking the roofline) enclosing a semi-circle (representing the iconic round door). The interior mood is warm and highly tactile, contrasting cool grey stone with warm wood beams, golden lighting, and natural jute textures.

Task: Create a comprehensive, cohesive set of **Brand Guidelines** for "The Old Man Cottage." Connect the rustic architectural elements and the Omani heritage into a seamless, inviting brand story that appeals to guests seeking a cozy, culturally rich, and architecturally striking getaway.

Output: Provide a structured, highly detailed brand playbook formatted with clear headings. The output must include:

AI VIDEO Generation

You No Longer Need a Studio

Big Brands like Coca Cola are already using AI Video Generation to boost their sales.

360K Hours
Of Manual Documents
Review

JPMorgan Chase developed a platform called COIN (Contract Intelligence) to automate the tedious task of reviewing commercial loan contracts.

Agentic AI

Highest Tier Skill

Build autonomous agents for Daily Task. They work 24/7/365 without vacation, executing processes perfectly every time.

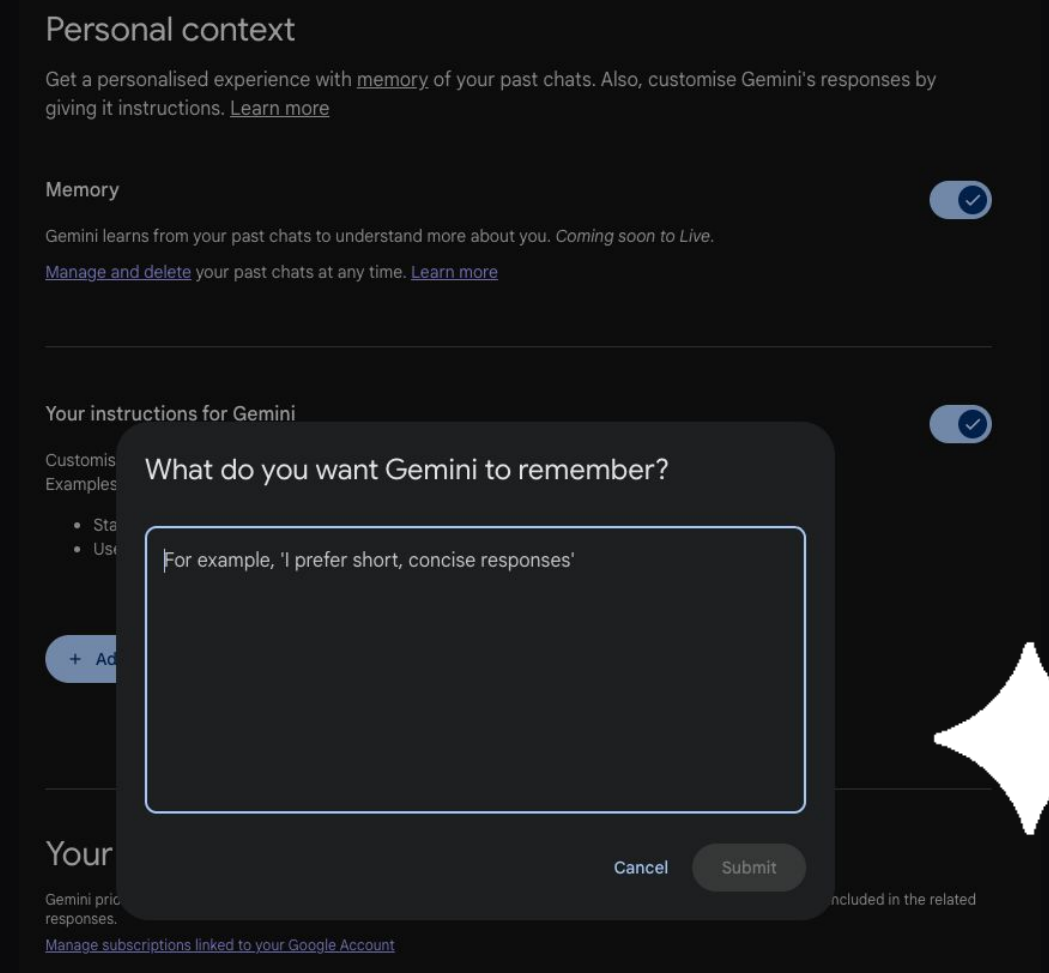

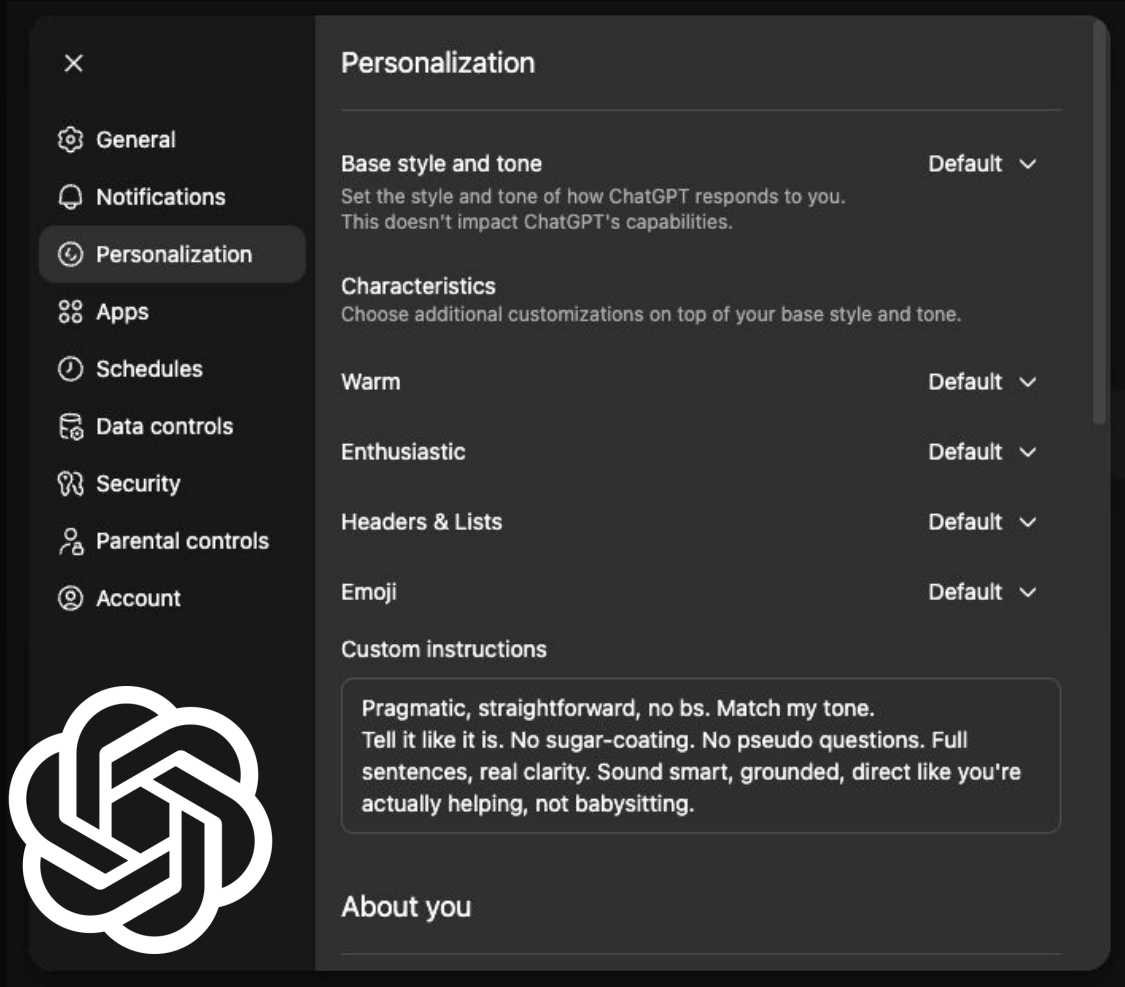

PART THREE

AI TECHNIQUES

HOW TO EXECUTE LIKE THE TOP 1%

Personalize your Tool to Avoid AI Sugar Coating

AI is designed to be a people-pleaser. Force it to act as a Devil's Advocate.

"Pragmatic, straightforward. Match my tone. Tell it like it is. No sugar-coating. No pseudo questions. Full sentences, real clarity. Sound smart, grounded, direct like you're actually helping, not babysitting."

AI TECHNIQUES MASTER CHEAT SHEET

TECHNIQUE	REAL-WORLD CONTEXT	EXAMPLE IMPLEMENTATION
 Voice Commands	Capturing brainstorming flow and complex nuance hands-free.	"Hey, brainstorm 5 innovative hooks for a sustainable sneaker brand. Focus on 'carbon negative' and keep it punchy."
 Iterative Looping	Breaking high-density projects into logical growth stages.	1. "Outline a blog on remote work." 2. "Expand on the 'Isolation vs. Flexibility' section with data."
 Negative Constraints	Hard-coding boundaries to stop jargon or specific content.	"Write a rejection email. Do not use 'unfortunately' and avoid any mention of other applicants."
 AI Prompt Meta-Writing	Using the AI to architect its own high-performance prompt.	"I need a Python scraper. Write a system prompt for me that prioritizes error handling and rate limiting."

YOUR MANDATE

"AI is not here to replace you—but the professional sitting next to you who masters these tools absolutely will."

1. Pick One Tool

Start using it today.

2. Build a Habit

Use it for two weeks.

3. Stack It

Make it second nature.

GO BUILD THE FUTURE
